Conclusions

- Generate neutrino masses
- Dark matter existence connected to neutrino masses
- Low scale lepton-quark unification in $SU(4)_c \otimes SU(2)_L \otimes U(1)_R$ model
- Scotogenic scenario and Pati-Salam symmetry in the context of unification of gauge interactions

Simple case: Extend $SU(5)$ to $SU(6)$ to include BSM particles needed

$\underline{5}_F^* \times \underline{10}_F \times \underline{5}_S$, $\underline{10}_F \times \underline{10}_F \times \underline{5}_S$ $SU(5)$ Yukawa terms are extended to

$\underline{6}_F^* \times \underline{15}_F \times \underline{6}_S^*$, $\underline{15}_F \times \underline{15}_F \times \underline{15}_S$ $SU(6)$ Yukawas

Anomaly free combinations: $\underline{5}_F^* + \underline{10}_F$ for $SU(5)$,
 $\underline{6}_F^* + \underline{6}_F^* + \underline{15}_F$ for $SU(6)$. New $SU(6)$ $\underline{21}_S$ scalar is added to obtain 2'nd Higgs doublet ($\mathbb{Z}_2 \sim -$) with new interactions

$\underline{6}_F^* \times \underline{6}_F^* \times \underline{21}_S$, $\underline{15}_S^* \times \underline{15}_S^* \times \underline{21}_S \times \underline{21}_S$

Less simple case: Extend $SU(5)$ to $SU(7)$ to include BSM particles needed

$\underline{5}_F^* \times \underline{10}_F \times \underline{5}_S^*$, $\underline{10}_F \times \underline{10}_F \times \underline{5}_S$ $SU(5)$ Yukawa terms are extended to

Anomaly free combination for $SU(7)$: $\underline{7}_F^* + \underline{7}_F^* + \underline{7}_F^* + \underline{21}_F$.

New $\underline{28}_S$ scalar needed to accommodate $SU(2)_N$ doublet, with new interactions: $\underline{7}_F^* \times \underline{7}_F^* \times \underline{28}_S$, $\underline{21}_S^* \times \underline{21}_S^* \times \underline{28}_S \times \underline{28}_S$

Conclusions

- Generates neutrino masses via Scotogenic scenario
- \mathbb{Z}_2 symmetry is not *ad hoc*
- Naturally accomodates DM
- Unifies gauge couplings at $10^{12} - 10^{16}$ GeV
- Predicts $\text{Sin}^2\theta_W(m_Z) = \frac{3}{8}$
- Lepton-quark unification @ 10^6 GeV
- Natural framework for different see-saw scenarios
- Rich phenomenology
