

Poster Presentations
NSPCS2026

P01	<u>Sehoon Bahng</u> , Jae Sung Lee, and Cheol-Min Ghim <i>Memory-aware feedback enhances power in active information engines.</i>
P02	<u>Ashwin Bhattathiripad</u> and Vipin P. Veetil <i>Escort-Driven Network Condensation, Anti-Condensation, and Nonequilibrium Cycles.</i>
P03	<u>Rong-Chih Chang</u> , and Pik-Yin Lai <i>Steady-state Response Theory in Noisy Network Dynamics.</i>
P04	<u>Changhee Cho</u> , Gyeong-Gyun Ha, Jae Woo Lee and Deok Seon Lee <i>Joint Component Size Distributions in Hypergraphs with Higher-Order Interactions.</i>
P05	<u>Yunsik Choe</u> , Euijoon Kwon, and Yongjoo Baek <i>Symmetry breaking chirality of an achiral gear in an active fluid.</i>
P06	<u>Hyun-Myung Chun</u> , Euijoon Kwon, Hyunggyu Park, Jae Sung Lee <i>Fluctuation-response theory for non equilibrium Langevin Dynamics.</i>
P07	Farhod Haydarov, <u>Shirali Kadyrov</u> , Khudoyor Mamayusupov, and Mirmukhsin Makhmudov <i>Effective Uniqueness for Renewal-Type Potentials on Mixing S-Gap Shifts.</i>
P08	<u>Gyeongho Ju</u> , Okyu Kwon, and Gabjin Oh <i>Distance Decay and Hub Dominance in Korea's Card-Transaction Consumption Network: An Intra- versus Inter-Regional Self-Containment Analysis.</i>
P09	<u>JaeGyeong Kang</u> , Ginestra Bianconi, K. -I. Goh, Byungjoon Min <i>Percolation process with cluster-size dependent recovery.</i>
P10	<u>Kirandeep Kaur</u> and Jong-Min Park <i>Power-Efficiency Trade-off in a Quantum Otto Engine Coupled to a Squeezed Thermal Reservoir: A Phase-Space Approach.</i>
P11	<u>Daon Kim</u> and Sang Hoon Lee <i>Fluid Dynamics of Nationwide Traffic: Simulating the Korean Highway Network via Macroscopic Traffic Flow Model.</i>
P12	<u>Do-Hyeon Kim</u> , Hyunmo Yang, and Cheol-Min Ghim <i>Assortativity and the breakdown of a common assumption in network dynamics.</i>
P13	<u>Jaesung Kim</u> , and Jae Woo Lee <i>Crypto vs. Stock Markets: A Visibility Network Approach.</i>
P14	<u>Minjun Kim</u> and Joonwoo Jeong <i>Density-dependent transition in bacterial self-organization driven by confinement and aerotaxis.</i>
P15	<u>Minseok Mason Kim</u> , and Yongjoo Baek <i>Thermodynamic Cost of Giant Transport in a Random-Protocol Flashing Ratchet.</i>
P16	<u>Yeongjin Kim</u> , Gleb Oshanin, and Jae-Hyung Jeon <i>Power spectral density of free and confined active Ornstein–Uhlenbeck particle trajectories.</i>
P17	<u>Yunsu Kim</u> , Su-Chan Park, and Dong-Hee Kim <i>Dynamical Phase Transitions in monitored Clifford circuits with symmetry-preserving feedback.</i>
P18	<u>Tae-Wook Ko</u> <i>Common Noise-Induced Group-Level Synchronization Between Uncoupled Groups of Oscillators.</i>
P19	<u>Rajeev Kumar</u> , Youngsuk Kim, and Jeong-Mo Choi <i>Metal Substitution in Semi-constrained Systems: DFT Study on a Metalloenzyme.</i>
P20	<u>Hosung Kwak</u> , Yongjoo Baek, and Hawoong Jeong <i>Tunable Mpemba effect in a polymer–bead system with inertia.</i>
P21	Euijoon Kwon, <u>Yongjae Oh</u> , and Yongjoo Baek <i>Quantifying information flow along a stochastic trajectory.</i>
P22	<u>Heeyeol Lee</u> , Minjun Kim, and Joonwoo Jeong <i>Oxygen-mediated self-organization in a bacterial–microalgal active suspension.</i>
P23	<u>YeongKyu Lee</u> , Changbong Hyeon <i>Free energy dissipation of periodically driven chemical reaction network.</i>
P24	<u>Cin Hua Pan</u> and Pik Yin Lai <i>Information Erasure in Spatially Nonuniform and Time-Dependent Temperature Fields.</i>
P25	<u>Leonardo Garibaldi Rigon</u> , Yongjoo Baek <i>Collective Dynamics and Curvature-Mediated Interactions of Active Ellipses in Deformable Vesicles.</i>
P26	Amir Shee, and <u>Privo Shankar Pal</u> <i>Mobility Anisotropy Reshapes Self-Propelled Motion.</i>
P27	<u>Joonhyun Shin</u> , Jinjoo Yoon and Gabjin Oh <i>Advancing Financial Market Simulation with Generative Adversarial Networks: A Case Study on the KOSPI 200 Index.</i>
P28	<u>Yu-Jin Shin</u> , Jangwon Bae, Yongwon Jung and Jeong-Mo Choi <i>Investigating the Growth Kinetics of Biomolecular Condensates via Molecular Dynamics Simulations.</i>
P29	<u>Gangmin Son</u> , Federico Battiston, Deok-Sun Lee, and Kwang-Il Goh <i>Competing heterogeneities shape ordering via higher-order interactions.</i>
P30	<u>Shuto Suzuki</u> , Akira Yoshimori <i>A universal method for deriving coarse-grained equations.</i>
P31	<u>Kiran V.</u> , Jong-Min Park <i>Two-Level Information Engines with Stochastic Measurement Intervals: Comparison with Fixed-Interval Engines.</i>
P32	<u>Minsoo Yang</u> and Byungjoon Min <i>Biconnectivity in directed random networks.</i>
P33	<u>Akira Yoshimori</u> <i>Steady state distributions and the Green–Kubo formula in AOUP systems.</i>
